

# RIGGING NOTES

List anything you feel needs to be mentioned to the Flight System Designer so they are aware of your operational thoughts and interests. **Please date and initial your entries. This is not a substitute for a Daily Inspection.** Print more blank copies of this document as needed.

For EMERGENCIES call 911. For system questions contact the designer or advising rigger.

For example: 11/14/11 – New horizontal operator trained and rehearsed. Will help with daily inspections. (initials)
